Disinfectant Service of
Avert® Sporidical
Sodium hypochlorite

Disinfectant Service of Divosan Etha
Plus **77% ethanol**, can be used for the
interim disinfection of small areas and
can be used in the **healthcare, food,**
hospitality

Step 2

Choose Process Of Service Fumigation Process (Recommended For Air Sanitation)

Ultra low volume (ULV) fogging
machines are cold fogging
machines that use large volumes of air
at low pressures to transform liquid
into droplets that are dispersed into the
atmosphere. This type of Fumigation
machine can reduce extremely
small droplets with diameters ranging
from 1–150 µm.

Mist Spray Process

The air inside the top of the bottle is at
higher pressure than the air in the tube,
so it pushes down on the liquid. The
liquid is forced up the tube toward the
pump mechanism. The liquid leaves as
a fine mist of aerosol spray.

Step 3

Contact + Choose Type of Sanitation Process

Rates : Flats : Upto 1300 Sqft Rs.1500
Above 1300 Sqft Rs.2500
Kothi : 2000 Per Floor /visit
